## FOOD SAFETY CHECKLIST

HOW WELL DOES YOUR FOOD BUSINESS RATE?

Under Council's **Eat Safe Logan** food safety rating scheme, all licensed food businesses within Logan will be issued with a food safety star rating. These will be based on an assessment conducted by Council under the *Food Act 2006* and good management practices. The scheme was introduced to protect the health and well-being of residents and visitors.

Use this checklist to assess your current food safety processes and work out an approximate **Eat Safe Logan** food safety rating. This checklist should be used in conjunction with the *Eat Safe Logan Food Safety Made Easy Guide* which helps businesses achieve high levels of food safety.

A similar checklist, the *Food Safety Audit Proforma*, is used by Council officers during the regular food safety audit to assess your business' food handling practices and procedures and also your **Eat Safe Logan** star rating.

The *Eat Safe Logan Food Safety Made Easy Guide* and further information about **Eat Safe Logan** is available at [www.logan.qld.gov.au](http://www.logan.qld.gov.au)

### HOW TO USE THIS CHECKLIST

#### STEP 1

The food licensee or Food Safety Supervisor can complete this checklist. Complete the administration details at the top of the checklist (e.g. name, date) to keep a record for your information.

#### STEP 2

Complete **Section A** in order – the checklist follows the typical flow of processing food from beginning to end (e.g. receive food, store food, process food, display/serve food).

**Section A** contains **Minor**, **Major** and **Critical** Compliance areas. All of these areas must be complied with as part of the *Food Act 2006* requirements. For definitions of these various compliance levels, refer to page 2 of this checklist.

If you believe your food business fully complies with each of the listed requirements, tick the 'Yes' box. If you are unsure, please refer to the *Eat Safe Logan Food Safety Made Easy Guide*.

If you find areas that **are not** complying with the listed requirements, tick the appropriate **Minor**, **Major** or **Critical** box. Refer to the next page for a general guide to identifying minor and major compliance issues.

Please note that some requirements throughout the checklist may not be applicable to your particular food business due to the limited nature of your activity.

## THE FOOD SAFETY CHECKLIST HAS TWO SECTIONS.

### SECTION A – COMPLIANCE DETAILS

**Section A** contains the food safety requirements outlined in the *Food Act 2006* and the *Food Safety Standards*. It is the food business' legal responsibility to comply with these. Any infringements of these provisions are noted and subsequently tallied to give an overall representation of the compliance against the *Food Act 2006*.

The three non-compliance selections within Section A represent the various levels of risk.

**Minor non-compliant** means there is a small, low risk breach that can be easily rectified during the normal course of the business. These issues are less likely to present a hazard to consumers. Examples include:

- slightly defective fixtures, fittings or equipment
- cracked tiles
- very minor cleaning issues.

Businesses can still achieve very good star ratings if a small number of minor non-compliant breaches are found.

**Major non-compliant** is more serious. It suggests a breach of the standard and exposes a high risk to food safety. The food business may not be able to quickly or easily rectify these issues during normal processes. Examples include:

- very unclean premises
- no hand washing facilities
- poor personal hygiene.

If **any** major non-compliances are found, **enforcement action may be taken** in the form of food improvement notices, on-the-spot fines, suspension or prosecution.

**Critical non-compliances** are associated with matters that **pose the highest risk** to producing safe food. These areas are determined to be fundamental in providing safe food to consumers. If a food business fails to comply with **any** of the critical requirements, **serious enforcement action may be taken** in the form of food improvement notices, on-the-spot fines, immediate suspension of licence or prosecution. Examples include:

- incorrect temperature control
- contamination of food
- the presence of pests and vermin.

### SECTION B – GOOD MANAGEMENT PRACTICES

**Section B** contains a list of management documents that identify and control food safety hazards in the handling of food in a food business. These documents are seen as effective tools in managing food safety risks associated with any food operation.

If a business can provide examples of these documents, Council will maintain confidence that the food business can operate at a higher level of compliance and reward the business through higher overall ratings.

The points associated with each management document kept are totalled to give the Section B score. These documents must be maintained on a frequent basis and kept on-site at all times.

Scores from both **Section A** and **Section B** are used to calculate the overall star rating. Free marketing material from Council will be provided to businesses who achieve 3 stars or more and decide to opt-in to publicly display their star rating.
