

1

Rainwater collected on roof.

2

Leaf debris, animal and bird droppings enter gutters.

3

Possible contaminated water from roof.

We recommend,
**YOU BOIL OR FILTER
TANK WATER.**

To improve the quality of your tank water, it's important to regularly check:

- Gutters, downpipes and roof for leaf debris.
- Tank inlets, insect-proof screens and leaf filters are clean and clear.
- Inside the tank for the presence of mosquito larvae and evidence of access by animals, birds or insects.
- Structural integrity of the tank and pipes for leaks.
