

Greenbank Road Pavement Rehabilitation Project

Location

Greenbank Road, North MacLean

Benefits

Improved road flood resilience

Improve road safety

Improve traffic flow

Provide more reliable travel time

What is happening?

We are upgrading approximately 1.4 kilometers of Greenbank Road, heading south from Andalusain Drive down to just north of Scott Lane.

This means a smoother road with wider lanes and shoulders and improved flood resilience to keep you moving.

Pavement rehabilitation works will include:

- › raising the road in some sections to improve flood resilience
- › widening lanes and building wider shoulders
- › reconstruction of the road pavement and excavation works in some sections
- › improving drainage
- › reinstatement of property entrances (affected residents will be contacted separately).
- › removal of vegetation and tree clearing within Council Road reserve as required.

LEGEND

- local roads
- work zone

When is it happening?

Main works are expected to commence late-July 2024 and are expected to be completed by December 2024, site and weather conditions permitting.

Works will generally occur Monday to Friday, between 6:00 am to 6:00 pm. Should works extend beyond these hours, we will notify affected residents.

What can I expect?

Every effort will be made to minimise disruption during these works. However, some temporary impacts can be expected.

Temporary Impacts

- › Changed traffic conditions including reduced speed limits, short term lane closure and detours (as needed).
- › Increased noise, dust and vibration.
- › Temporary disruption to driveway access. Affected residents will be notified in advance.
- › Clearing of trees and vegetation where required

What are we doing?

- › Traffic control and site representatives to assist motorists.
- › Traffic changes will be communicated via electronic signs. Motorists are encouraged to plan their journey and allow extra travel time.

Project funding

These works are aimed at reconstructing the road and drainage network in our city following the major rain event of 2022.

This project is jointly funded by Commonwealth and State governments' Disaster Recovery Funding Arrangements (DRFA) for the Restoration of Essential Public Assets and the program's Betterment Fund, in addition to Council's Capital Works Program.

Contractor appointed

We have appointed a contractor, Alder Constructions to undertake these works. To reduce the duration of construction, multiple crews will be working across the project zone. This will speed up the works and minimise disruption to the community.
